PROFESSIONAL SUMMARY

Final-year **B.Tech (Information Technology)** student and **Data Analyst** with hands-on experience in **SQL, Python**, and end-to-end **data pipelines**. Skilled in **Pandas, NumPy, Matplotlib**, and **statistical analysis**, with a track record of cleaning **10,000+ record datasets**, building **anomaly-detection models**, and cutting manual processing time by **~40%** through **automation**. Seeking an entry-level **Data Analyst** role where I can turn raw data into decisions from day one.

TECHNICAL SKILLS

Languages & Tools: Python, SQL, HTML, Java

Libraries & Frameworks: Pandas, NumPy, Matplotlib, scikit-learn

Core Competencies: Data Cleaning, EDA, Statistical Analysis, Data Validation, Process Automation, Dashboarding & Reporting, Data Visualization

Currently Learning: Google Cloud Platform (GCP), Power BI / Tableau fundamentals

PROFESSIONAL EXPERIENCE

Python & Data Processing Intern — InternPe (Remote)

Sep 2024 – Oct 2024

Designed and deployed **Python automation scripts** to eliminate repetitive data-processing tasks, reducing manual effort by **~40%** per processing cycle.

Cleaned and preprocessed **multi-source datasets** using **Pandas and NumPy**, improving downstream data quality and analytical reliability.

Produced **reusable, well-documented code modules** adopted team-wide, reinforcing consistent data-handling standards.

Applied systematic **debugging methodologies** to identify and resolve logic errors across data-transformation pipelines.

KEY PROJECTS

1. Salary Anomaly Detection & Pay Equity Analysis

Python · Pandas · NumPy · Matplotlib

Cleaned and validated **10,000+ employee records** using Pandas and NumPy to ensure **100% data integrity** for statistical modeling.

Detected **salary inconsistencies** and departmental pay gaps through **anomaly detection** and descriptive statistics.

Generated **compensation insights** supporting transparent, data-driven pay decisions — directly transferable to business/sales analytics.

2. Customer Data Cleaning & Standardization Pipeline

Python · Pandas

Engineered an **end-to-end automated pipeline** to standardize raw customer datasets, significantly reducing preprocessing time.

Improved **data consistency** across fields, enabling reliable downstream analytics and reporting.

Designed a **modular, reusable pipeline architecture** extensible across multiple data-source types.

3. Customer Delinquency Prediction & EDA

Python · Pandas · NumPy · Matplotlib · Seaborn · Google Colab

Performed **EDA** on **500 customer financial/behavioral records** to identify delinquency risk indicators.

Analyzed **missing values, data-quality issues, feature distributions, and correlations**.

Produced detailed **EDA reports** and recommended preprocessing strategies for downstream ML models.

4. Multi-Category E-Commerce Website

HTML · CSS · JavaScript

Built a **Flipkart-style multi-category shopping platform** with a clean UI and direct product-page redirection.

Demonstrated cross-functional capability across **frontend development, product thinking, and UX design**.

EDUCATION

Bachelor of Technology — Information Technology

2022 – 2026 (Expected)

Bharat Institute of Technology, Meerut

CERTIFICATIONS & ACHIEVEMENTS

[Python Programming Internship Certificate](#) — InternPe (2024)

[Data Analyst Internship Certificate](#) — Unstop Tech Fair (2025)

[Certificate of Participation](#) — AIQrew (2025)

[Certificate of Participation](#) — BitQuiz Main Quiz (2025)
